13. In the Model 2 place a green star by each process (A, B, C, or D) that represents photo- synthesis, and a red star by each process (A, B, C, or D) that represents cellular respiration. Write and label equations for cellular respiration and photosynthesis

Read PDF 27 2 Respiration Answers

below. Circle the carbon dioxide in each. If you need help, see Model I. 7 + cop 15.

Grosse Pointe Public School System / GPPS Home

Did you know there are two kinds of respiration? One kind of respiration is when we breathe air in and out of our lungs. The other kind happens in both plant and animal cells, including people's cells. Animals and plants need oxygen. When an animal breathes, it takes in oxygen gas and releases carbon dioxide gas into the atmosphere.

Respiration - crma12.org

Respiration MCQ (Multiple Choice Questions and Answers) Q1.

Respiration converts potential or stored energy of food into
Chemical energy Mechanical energy Kinetic energy All forms of
energy Answer: 1 Q2. Cellular respiration is Continuous

Intermittent Performed at intervals Held when energy is required
