This means that, unlike NFPA 1600, which is primarily a local U.S. standard, ISO 22301 is recognized in most countries as the main business continuity standard or framework. The funny thing is, NFPA 1600 is much longer (66 pages), but it's free, whereas ISO 22301 is shorter (32 pages) and it is rather expensive, as are all the other ISO ...

NFPA 1600 vs. ISO 22301 - Similarities and differences

reason. NFPA 54 (2006), 8.2.3 states that "Immediately after the gas is turned on into a new system or into a system that has been initially restored after an interruption of service, the piping system shall be tested for leakage. If leakage is indicated, the gas supply shall be shut off until the necessary repairs have been made".
