bound to find one that interests you here. You have the option to browse by most popular titles, recent reviews, authors, titles, genres, languages, and more. These books are compatible for Kindles, iPads and most e-readers.

7th Grade Module 3 Expressions

Grade 7 Module 3: Expressions and Equations. This module consolidates and expands upon students' understanding of equivalent expressions as they apply the properties of operations to write expressions in both standard form and in factored form. They use linear equations to solve unknown angle problems and other problems presented within context to understand that solving algebraic equations is all about the numbers.

For example, some expressions students may write include $\$40 - 3(p + d)$, $\$2(20) - 3p - 3d$, or $\$40 - (3p + 3d)$. Students can discuss if two expressions are equivalent and why or why not. Students can ask each other how they created their expressions to understand different ways of looking at the situation (MP.3).
