API Standard 670 - Machinery Protection Systems, 5th edition. The API STD 670 covers the minimum requirements for a machinery protection system measuring radial shaft vibration, casing vibration, shaft axial position, shaft rotational speed, piston rod drop, phase reference, overspeed, and critical machinery temperatures (such as bearing metal and motor windings).

API STD 670: 2014 [paper] - Kreisler Publications

his year marks the 25th anniversary of the American Petroleum Institute (API) Standard 670, outlining the supply of Machinery Protection Systems. 2001 also marks the release of the newly revised 4th edition of the standard. This article will provide some history on API 670 - where it came from, why it is important, and when to use it.

A New Edition of API 670 - Neal Systems Incorporated

My understanding based on API 670 5th Edition 2014 and API 617 8th Edition 2014, surge system can be 2 systems, first one is Antisurge Control and second one is Surge Detection. Based on Page 143 API 670 Paragraph K.3.9 the next line of defence is Surge Detection as an absolute protection if Antisurge Control failed.
