help to explain the logical structure of databases. ER diagrams are created based on three basic concepts: entities, attributes and relationships.

## **ER Diagram: Entity Relationship Diagram Model | DBMS Example**

The E-R model can result problems due to limitations in the way the entities are related in the relational databases.

These problems are called connection traps. These problems often occur due to a misinterpretation of the meaning of certain relationships. Two main types of connection traps are called fan traps and chasm traps. Fan Trap. It occurs when a model represents a relationship between entity types, but pathway between certain entity occurrences is ambiguous.

## **What are the Problems with E-R Model? - Computer Notes**

The first is the 'fan trap'. It occurs with a (master) table that links to multiple tables in a one-to-many relationship. The issue derives its name from the way the
