### Amazon.com: EVGA GeForce GTX295 Co-op Edition 1792MB DDR3 ...

EVGA is proud to announce the latest and fastest in high performance graphics accelerators, the EVGA GTX 295 CO-OP Edition. This card combines two GPUs onto a single PCB (printed circuit board), a clear indication on why this card is called CO-OP! Want even more performance? Pair up two of these for QUAD SLI, or pair up with the standard GTX 295.

### EVGA - Articles - EVGA GTX 295 Co-Op

With the introduction of the EVGA GTX 295 SC and FTW models, EVGA has taken the performance beyond extreme with the EVGA GTX 295 CO-OP! This card combines two GPUs onto a single PCB (printed circuit board), a clear indication on why this card is called CO-OP! Want even more performance?

### EVGA debuts GTX 295 CO-OP Superclocked and FTW

Re:Overclocking The 295 CO-OP 2010/02/07 20:12:02 from what i've seen, a coop can get to the low 700's (know of one at 714 and another at 704) but after that i think the gpu needs voltage. note every card is different some may only get to 600, never know. as for temps, the one at 704 stays high 50's but thats about it

### Overclocking The 295 CO-OP - EVGA Forums

The 295 vents heat out the back of the case and into the case(unless you have the Co-op) so a good cfm fan bringing air in or out of the side is a must. I would say turn the fan up to 75% or higher and see if that help, it should. 75% is usually more than enough for any card on any game. whether it is Crysis or F@H 70% keeps my high OC cards under 70c.

### GTX 295 temps and fan speed question... - EVGA Forums

The GeForce GTX 295 EVGA CO-OP 1792MB Edition requires 289 Watts to run and the GeForce GTS 240 requires 120 Watts. We would recommend a PSU with at least 680 Watts for the GTX 295 and a PSU with...
