About First Facts: Farm. Children reach an age when suddenly they want to simply learn. Everywhere they look it's "how," "why," "where," "what." Studies suggest that between the ages of 4 and 7 children's brains are the most like sponges, absorbing information at an extraordinary rate. Children at this age have grown out of flaps and other ...

Farming began around 10,000 B.C. during the First Agricultural Revolution, when nomadic tribes began to farm. Additionally, this is when the eight so-called “founder crops” of agriculture appeared: 1) emmer wheat, 2) einkorn wheat, 3) hulled barley, 4) peas, 5) lentils, 6) bitter vetch, 7) chickpeas, and 8) flax.

Farming meant that early humans could control their sources of food by growing plants and raising animals. They did not have to move in search of food and eventually began to settle in one place all year round. Around 5000 BCE, the plough was invented, which made it easier to sow seeds in the ground.
