In this kind of problem we're being asked to compute the differential of the function. In other words, (dy) for the first problem, (dw) for the second problem and (df) for the third problem. Here are the solutions. Not much to do here other than take a derivative and don't forget to add on the second differential to the derivative.

Calculus I - Differentials

Using the J1C1109 rear differential fluid, begin filling the rear differential through the fill port on the right driver side of the differential. Fill the differential with fluid until you see the differential fluid flow from the fill port. Make sure you have your drain pan container handy in order to catch the flow of fluid.

How To Change Audi Rear Differential Fluid

Once the plug is removed, insert the funnel into the hole, and begin to pour in the new differential fluid. In many cases, the amount given by the manufacturer
