The hyperventilation syndrome--research and clinical ...

Hyperventilation Syndrome: Research and Clinical Treatment (Johns Hopkins Series in Contemporary Medicine and Public Health) Hardcover - December 1, 1986 by Professor Robert Z. Fried PhD (Author)

Hyperventilation Syndrome: Research and Clinical Treatment ...

Neither volume includes the hyperventilation syndrome, the subject of this monograph. The author, Robert Fried, is unhappy about this. He points out that anxious people hyperventilate. Hyperventilation causes anxiety. This is so well known, he believes, that omitting the hyperventilation syndrome is incomprehensible. DSM-III did not overlook breathing. It frequently uses words like "dyspnea," "smothering sensations," or "sighing."

Clinical Aspects and Treatment of the Hyperventilation ...

The hyperventilation syndrome is the name given to a distinctive group of symptoms and signs which are caused by an increase in the depth and rate of breathing. This abnormal breathing is nearly always the result of emotional stress. Export citation Request permission

The Hyperventilation Syndrome | Journal of Mental Science ...

Hyperventilation syndrome (HVS); also known as chronic hyperventilation syndrome (CHVS), dysfunctional breathing hyperventilation syndrome, cryptotetany, spasmophilia, latent tetany, central neuronal hyper excitability syndrom (NHS), is a respiratory disorder, psychologically or physiologically based, involving breathing too deeply or too rapidly (hyperventilation).

Hyperventilation syndrome - Wikipedia

Hyperventilation syndrome is an area of medicine under current study. Hyperventilation research focuses on understanding the conditions that predispose some people to this syndrome as well as its relationship to related disorders. When to Seek Medical Care for Hyperventilation

Hyperventilation Syndrome Symptoms, Causes, Effects ...

The paper by Jack and coworkers in the current issue of the Journal(pp. 118-125) describes aspects of control of breathing in a group of patients with idiopathic hyperventilation (1). Hyperventilation involves medicine, physiology, psychology, and psychiatry, although it has failed to attain legitimacy in any of these specialties.

Hyperventilation | American Journal of Respiratory and ...

Dysfunctional breathing/ hyperventilation syndrome is a breathing problem that involves breathing using a poor pattern or breathing too deeply or too rapidly (or both) (hyperventilation). There are many possible causes of dysfunctional breathing and if left untreated it can lead to a variety of unpleasant symptoms such as breathlessness, dizziness, pins and needles and chest pain.

Search Results - Hyperventilation syndrome - National ...

Abstract THE HYPERVENTILATION syndrome is a common, often disabling, and frequently inadequately treated clinical problem. Diagnosis is often missed, perhaps because physicians are not sufficiently aware of it or because patients rarely demonstrate the classic textbook picture of obvious overbreathing, paresthesia, and tetany.

Hyperventilation Syndrome: A Brief Review | JAMA | JAMA ...

Also known as Pickwickian Syndrome Obesity hypoventilation syndrome is a breathing disorder that affects some people who have been diagnosed with obesity. The syndrome causes you to have too much carbon dioxide and too little oxygen in your blood. Without treatment it can lead to serious and even life-threatening health problems.

Obesity Hypoventilation Syndrome | National Heart, Lung ...

A postal survey indicated that 8% of adults without asthma have functional breathing problems (of which symptomatic hyperventilation is the most common). Hyperventilation syndrome is more common in people with asthma and also more common in females. It is more common in asthmatic patients, occurring in 29% in one survey.

Hyperventilation. What causes hyperventilation ...

The hyperventilation syndrome describes a condition in which an inappropriate increase in minute ventilation beyond metabolic needs (ie, in excess of what is necessary for CO₂ production, which leads to a respiratory alkalosis) is associated with a wide range of symptoms without a clear organic precipitant.
