Industrial design is a process of design applied to products that are to be manufactured through techniques of mass production. A key characteristic is that design precedes manufacture: the creative act of determining and defining a product's form and features takes place in advance of the physical act of making a product, which consists purely of repeated, often automated, replication. This distinguishes industrial design from craft-based design, where the form of the product is determined by t

This story is a reflection of my brief encounter with VR during my last design process. I am an industrial designer and by far not an expert on VR. However, I want to share some of the notes I wrote down of how I see VR being a valuable tool in my future projects. I hope this story can give you some new thoughts to take with you into your next ...
