Led tv power supply module

Apparently, Samsung's power supply on several LCD models was somewhat under-designed, with four capacitors that slowly fail over time and which leads to the symptoms in the title. There are several options for repair: 1) Take the set to a qualified repair shop

Access Free Lcd Tv Power Supply Repair Guide

(est \$300 - \$500). 2)

Buy a new,
replacement, power
supply (\$100 - \$175).
