Calculate joint range of motion by measuring the angles between the beginning position and the ending position of available motion. Goniometers similar to a carpenter level are called gravity-dependent goniometers, or inclinometers, and are used most often to measure motion in the spine. Use of a tape measure to examine ROM of the spine.

### Measuring Range of Motion - Human Kinetics

The techniques detail measurement of both joint range of motion and muscle length testing of the spine and extremities using the goniometer, the inclinometer, and the tape measure. An effective combination of instructions, illustrations, and layout for each technique allows you to easily understand and follow the information provided.
