A Final Problem -- Page 19 of 22 - sciencecourseware.org

The graph below shows the daily discharge of the Cedar River for all of 2007. Every year, the discharge for the river is slightly different, but 2007 was a typical year for this river system. (Remember that the height of the water is related to discharge, so when discharge rises, the river level also rises.)

Unit 4: Hazards from Flooding - SERC

5.2.2.1 River Discharge River discharge is the main source of freshwater flowing into the Bay of Biscay. Rivers in the Cantabrian shelf are short and flow swiftly, although with a small runoff due to the proximity of mountain ranges to the coast. These together supply a mean freshwater discharge of 400 m³ s⁻¹.
