Sql Performance Explained Everything Developers

Optimizing SQL, writing performant queries, is something that every developer dealing with databases ought to know how to do but it is not something taught in any SQL class I've seen or, if it is, it's always either taught steeped in an RDBMS-specific way that makes the knowledge difficult to apply to other databases or so academically that it's hard to know how any of it applies.

SQL Performance Explained Everything Developers Need to ...

Many developers have years of SQL experience yet they know very little about the processing that happens in the database. The separation of concerns—what is needed versus how to get it—works remarkably well in SQL, but it is still not perfect. The abstraction reaches its limits when it comes to performance: the author of an SQL statement

SQL Performance Explained Everything Developers Need to ...

As I totally agree the author's claim, that SQL performance tuning is not just a DBA task but a developer's task, as the performance is related to business logic and only developers understand that. And also we should think performance from design, and it's not an afterthought. Posted by Andy Wang Mar 30 th, 2015
