There is more than one solution..at least $T=1/100$ and $T=11/100$ work. To get such a simple one line solution they are simply using $\text{sinusoid}(nw) = \text{sinusoid}(n(w+2\pi))$. The $11/100$ works immediately for the first $\sin(\pi n/5)$ but for the cosine they add 2π several times until the original cosine matched the sampled one when using $T=11/100$.
